

This licence and/or permit is issued under the authority of SECTION 52 OF THE FISHERY (GENERAL) REGULATIONS.

This licence and/or permit authorizes the person(s) listed below, subject to the following terms and conditions, to collect the species and quantity of fish identified below for: Scientific purposes. Non-compliance with any condition of this licence and/or permit may result in the cancellation of this licence and/or permit.

Licence/Permit Activity Description:

Sampling to inform fish presence/absence, species composition/density, abundance estimates, movement, growth, and survival as part of habitat confirmations and effectiveness monitoring related to fish passage restoration at barrier culverts.

This licence authorizes fishing to determine the presence or absence of fish species in the waterbodies listed within the this licence.

No fish may be retained under the authority of this licence.

Licence Holder:

FIN: 149478

NEW GRAPH ENVIRONMENT
LTD

6 REGENT ST.
NELSON BC V1L 2W4

Contact Number: 250-777-1518

Contact Party:

FIN: 149479 IRVINE, ALLAN

Contact Number: 250-777-1518

Allowable Fishing Times:

Fishing periods defined for a species supersede all periods defined in this section.

Start: Tuesday, September 9, 2025 at 00:01 **End:** Tuesday, September 30, 2025 at 23:59

Details: The Licence Holder/Operator is **NOT** permitted to electroshock/electrofish in Wansa Creek, Bittner Creek, Tsadeta Creek, Snowshoe Creek, and the Nechako River and it's tributaries during this timeframe. All other gear types listed in the section titled Species, Quantity of Fish, Area(s) and Gear are permitted.

Excluding Wansa Creek, Bittner Creek, Tsadeta Creek, Snowshoe Creek, and the Nechako River and its tributaries, the Licence Holder or Operator is permitted to fish in all waterbodies listed in the appendix of this licence using all gear types specified under "Species, Quantity of Fish, Area(s), and Gear.

Start: Wednesday, October 1, 2025 at 00:01 **End:** Friday, October 31, 2025 at 23:59

Details: The Licence Holder/Operator is **NOT** permitted to electroshock/electrofish in the Nechako river and it's tributaries during this timeframe. All other gear types listed in the section titled Species, Quantity of Fish, Area(s) and Gear are permitted.

Excluding the Nechako River and its tributaries, the Licence Holder or Operator is permitted to fish in all waterbodies listed in the Appendix of this licence using all gear types specified under "Species, Quantity of Fish, Area(s), and Gear.

Individuals or groups assisting with the authorized activity:

All employees of New Graph Ltd. are authorized to fish under this licence

Species, Quantity of Fish, Area(s) and Gear:

Species: CHINOOK SALMON (*Oncorhynchus tshawytscha*); COHO SALMON (*Oncorhynchus kisutch*); PINK SALMON (*Oncorhynchus gorbuscha*); SOCKEYE SALMON (*Oncorhynchus nerka*);

Life Stage: Juvenile

Gear: Trap, Gee/Minnow (Set Duration Max: 24 Hours)
Dip Net
Electroshocker
Seine Net

Licence Area: See Appendix

To be Retained: 0

Reporting Requirements:**XR 463 2025****Due Date** 31-Dec-2025

The Appendix 1 must be completed within 60 days of completion of the fishing activities outlined in this licence and submitted to the mailbox: DFO.BCILicence-LicenceICB.MPO@dfo-mpo.gc.ca

Additional Information:

Activities authorized in this licence may be subject to orders issued by DFO. Notices of orders can be found online at: https://notices.dfo-mpo.gc.ca/fns-sap/index-eng.cfm?pg=fishery_search&ID=all.

The use of ALL of these licence(s) is subject to any conditions which are issued by DFO. The licence holder must ensure that they have received the licence conditions, and may NOT conduct any fishing activity with any of these licence(s) unless in receipt of the licence.

Terms and Conditions:

Licence authority: This licence authorizes fishing activities and sample collections to be undertaken by the Licence Holder and members, employees, volunteers and students of the Licence Holder and designated individuals or groups assisting the Licence Holder (herein referred to as Operator) provided that all persons (other than minors who are engaged in activities under the authority of this licence) are carrying suitable photo identification to be produced upon request of a Fishery Officer or Fishery Guardian.

Document(s) to be carried while fishing: The Licence Holder/Operator must carry a copy of the licence while conducting fishing activities and while in possession of fish caught or fishing gear used for fishing under the authority of this licence and must produce this licence upon request by a Fishery Officer or Fishery Guardian.

Species permitted to be fished: This licence authorizes fishing for and release of the species identified in the Species, Quantity of Fish, Area(s) and Gear section of this licence.

This licence does not authorize fishing for non-anadromous (freshwater) species or Steelhead trout or Cutthroat trout. Approval to fish for these species must be obtained from the Province of British Columbia (BC) prior to the commencement of fishing.

Species at Risk: The Licence Holder/Operator is prohibited from fishing for species at risk or engaging in an activity affecting a species that is listed as “endangered” or “threatened” under Schedule 1 of the *Species at Risk Act* (SARA), including those identified anywhere in the Species, Quantity of Fish, Area(s) and Gear part of this licence, unless authorized under a separate permit issued in accordance with the *Species at Risk Act*.

Nothing in this licence shall be construed as authority to contravene Sections 32 (1), 32 (2), 33 or 58 of the *Species at Risk Act*, with respect to any species listed under SARA as extirpated, endangered, or threatened. If the activity may affect a listed wildlife species, any part of its critical habitat or its residences, a Section 73 SARA permit may be required in addition to this licence. For more information on SARA Section 73 permits, please visit: <https://www.dfo-mpo.gc.ca/species-especes/sara-lep/permits-permis/index-eng.html> or contact DFO.PACSAR-LEPPAC.MPO@dfo-mpo.gc.ca. A list of SARA protected species can be found at: <https://www.canada.ca/en/environment-climate-change/services/species-risk-public-registry.html>.

Notification prior to fishing:

At least 24 hours prior to licenced activities taking place, the licence holder shall email the Conservation and Protection Detachment closest to the fishing area, as specified in the Species, Quantity of Fish, Area(s), and Gear part of this licence; with the following information:

- (a) Licence Number;
- (b) Dates and times when fishing will occur;
- (c) Locations to be fished; and
- (d) Names of employees who will be conducting the sampling.

List of Conservation and Protection Detachments and their respective contact emails:

1. Prince George and Williams Lake: Detachment Commander - Stan Kish (Stan.Kish@dfo-mpo.gc.ca)
2. Lillooet and Lytton: Field Supervisor - Wade Larson (Wade.Larson@dfo-mpo.gc.ca)
3. Kamloops Area and North Thompson: Field Supervisor - Wade Larson (Wade.Larson@dfo-mpo.gc.ca)
4. Salmon Arm and Columbia Watershed: Field Supervisor - Cory Morrison (Cory.Morrison@dfo-mpo.gc.ca)

Fishing gear: Notwithstanding s. 27 of the Fishery (General) Regulation, SOR/93-53, the Licence Holder/Operator must ensure that unattended gear is clearly marked with either the Vessel Registration Number or the name and phone number of the person who owns the gear.

Fishing gear shall not be set or used in such a manner or in such a place that they or any equipment that is attached to any of them interferes with the public right of navigation. Fishing gear that interferes with safe navigation can be removed under the *Canadian Navigable Waters Act*.

The Licence Holder/Operator is prohibited from discarding in Canadian fisheries waters any item that may be harmful to fish or fish habitat including but not limited to plastics, ropes, fishing gear, garbage bags, fuel, oil, rags, glass, bottles, metal, extruded polystyrene foam (e.g. Styrofoam), and tires.

While fishing under the authority of this licence, the Licence Holder/Operator is prohibited from interfering with lawful fishing activities by tampering with traps, nets, bait or any other thing used for fishing, and is prohibited from otherwise interfering with the conduct of the fishing activities by another person.

Manner in which fishing gear is permitted to be used: The Licence Holder is only permitted to fish using only the fishing gear specified in the Species, Quantity of fish, Area(s) and Gear part of this licence.

It is the responsibility of the Licence Holder/Operator to ensure that the authorized persons fishing under this licence are experienced and competent in the fish collection methods and gear authorized in this licence.

The Licence Holder/Operator must take care when working in potential salmonid spawning habitat to avoid or minimize streambed disturbance.

The Licence Holder/Operator must ensure that when setting non-tended gear (i.e., minnow traps) permitted under this licence, that non-tended gear must be tended at least once every 24 hours. If mortalities are observed the Licence Holder/Operator must reduce the set interval of the non-tended gear.

When fishing with a seine net permitted in this licence, the Licence Holder/Operator must record the water temperature, length, position, and duration of each seine netting event. Net loads of fish should not contain excessive numbers of fish. No more than 1/3 of the net volume should contain fish.

Unless water conditions preclude their use, the Licence Holder/Operator is permitted to use only knotless seines when fishing for adult salmon. The mesh size of the seine net must be such that adult Pacific salmon do not become entangled behind the operculum. The Licence Holder/Operator is not permitted to fish with a seine net for adult salmon when the water temperature is greater than 20 degrees Celsius (°C) at the surface.

"Electrofishing" means using an electric current to attract and temporarily immobilize a fish to allow capture.

If electrofishing is to be used:

- (a) A person trained and certified in the use of electrofishers must be a part of the electrofishing crew.
- (b) Electrofishing must not be conducted in the vicinity of spawning gravel, redds or spawning fish, or around gravels which are capable of supporting eggs or developing embryos of any species of salmonid at a time of year when such eggs or embryos may be present. If salmonid spawning behaviour is noted at any time, the Licence Holder/Operator is required to cease all electrofishing activities.
- (c) Electrofishing is only permitted after extensive use of other gear during sampling activity indicates no presence of juvenile salmonids. This condition does not apply in those areas and water conditions where the use of other gear may cause more harm to fish than electrofishing.
- (d) No electrofishing is permitted to take place in waters having a temperature less than 5 degrees Celsius (°C) or greater than 20 °C.

The Licence Holder/Operator must ensure that when fishing with the permitted gear in this licence, that any incidental mortalities of Pacific salmon species are reported to a DFO Fishery Officer as soon as practical and within 24 hours to DFO Resource Management by email to Patricia House at patricia.house@dfo-mpo.gc.ca.

Fish sampling: The Licence Holder/Operator must ensure that sampling of fish is completed by persons trained in proper fish handling, tissue sampling and marking techniques.

The Licence Holder/Operator must ensure measurements of body condition, such as weight and length, which involve hands-on manipulation, are conducted quickly and in a manner that is minimally stressful.

No sampling of Salmon shall take place in waters having a temperature greater than 20 degrees Celsius (°C).

Release of fish: The Licence Holder/Operator must ensure that all species captured are released into the water body or course from which they originated, and as near as possible to the location from which they were sampled. Fish must be released in a manner that causes the least harm.

Introductions and transfers: Other than releasing live fish immediately into waters in which they were caught, the Licence Holder/Operator is prohibited from releasing live fish into fish habitat and/or transferring live fish to any fish rearing facility unless in possession of a licence issued pursuant to Section 56 of the Fishery (General) Regulations.

If the fishing activity, permitted in this licence, requires the release of live fish into fish habitat (other than releasing live fish immediately into waters in which they were caught) or the transfer of live fish into a fish rearing facility, the Licence Holder/Operator must contact the Introductions and Transfers Committee of the province representing the aquatic organisms' final destination to discuss whether an Introductions and Transfers Licence may be required. For more information regarding the review process for the movement of live fish, visit:

<https://www.dfo-mpo.gc.ca/aquaculture/management-gestion/it-code-eng.htm>, or you may also contact:

- British Columbia Introductions and Transfers Committee by email at: DFO.BCITC-CITCB.MPO@dfo-mpo.gc.ca or DFO.salmonITC-CITsaumon.MPO@dfo-mpo.gc.ca

Aquatic animal domestic movements: If you are considering moving dead fish or parts of fish collected under this licence from within British Columbia to outside of British Columbia, you are required to apply and receive a permit from the Canadian Food Inspection Agency (CFIA) prior to proceeding. For more information regarding a CFIA domestic movement control permit, visit:

<https://inspection.canada.ca/about-the-cfia/find-a-form/form-cfia-acia-5743/eng/1410362945783/1410362946643>.

Disposition of fish: Any fish captured and collected for sampling, or incidental mortalities associated with non-lethal fishing and sampling methods permitted under the authority of this licence are not permitted to be sold and are prohibited from being utilized for human consumption or personal use purposes unless authorized by Fisheries & Oceans Canada.

Aquatic Invasive Species (AIS): Nothing in this licence shall be construed as authority to import, possess, transport, release or introduce into a particular region or body of water frequented by fish where it is not indigenous, any aquatic invasive species listed in Parts 2 and 3 of the Schedule of the Aquatic Invasive Species Regulations (SOR/2015-121). The Aquatic Invasive Species Regulations can be found online at:

<https://laws-lois.justice.gc.ca/eng/regulations/SOR-2015-121/FullText.html>.

Clean, drain, dry and decontaminate: The Licence Holder/Operator must clean, disinfect and decontaminate all gear and equipment including waders, nets, electrofishing cathodes and anodes and buckets, boats and trailers that were used in any freshwater and coastal waters before transferring to another body of water.

Additional precautionary measures that shall be taken to avoid the introduction and/or transportation of aquatic invasive species (AIS) into other waters:

1. Inspect and clean plants, animals, mud, and sediment from all equipment used below the high watermark.
2. Drain all water from equipment used below the high watermark.
3. Dry all parts of equipment completely before leaving the site.
4. All organic matter and wash water generated during cleaning must be disposed of on land.

For further information, please visit:

<https://www.dfo-mpo.gc.ca/species-especes/ais-eae/index-eng.html>

<https://www.dfo-mpo.gc.ca/species-especes/ais-eae/prevention/index-eng.html>

Reporting requirements for fishing activities: The Licence Holder/Operator must complete the Section 52 Licence Report Form (Appendix 1 of licence), by project, in the format provided by Fisheries and Oceans Canada.

The completed Section 52 Licence Report Form must be submitted to Fisheries and Oceans Canada electronically via email to: DFO.BCILicence-LicenceICB.MPO@dfo-mpo.gc.ca within 60 days of completion of the fishing activities as outlined in this licence.

In the event that the licence holder does not fish under the authority of this licence, the licence holder is responsible for submitting a nil report. A nil report shall consist of the licence number and a statement indicating that no fishing took place.

Licence validity: The use of the licence(s) is subject to any conditions which are issued by Fisheries and Oceans Canada. The issuance of this licence implies no commitment by the Minister of Fisheries and Oceans Canada (DFO) to reissue the licence in subsequent years. This licence may be amended or revoked by DFO prior to the expiry date if deemed necessary.

Compliance with the *Fisheries Act*: Pursuant to subsection 22(6) of the Fishery (General) Regulations, compliance with the *Fisheries Act* and the regulations made under the Act is a condition of this licence. A breach of licence conditions is a *Fisheries Act* offence.

By signing on this document, the person(s) listed below, agree to be bound by the terms and conditions that pertain to each person as an individual and to the group as a whole.
